

DOGKAGE LITEPAPER V1

THE IDEA ABOUT US

DogKage is intended to start off as a full blown meme token with high standards and expectations. With the potential of dog tokens booming in the near future, we decided to go with the animal/anime meme route due to popularity and demand. If and when the token booms, we will be announcing the game pitch documents and token partnerships lined up.

WHAT IS A KAGE?

A “KAGE” stands as a leader of a village. The Kage's job is to protect the village.

In the Shinobi ranks, the Kage holds the highest tier in ranking giving it the leadership/protector role. What are the expectations of a KAGE? The primary role of a KAGE is to protect the village from harm. In order to achieve this, the Kage must must be strong, know how to handle proper leadership, quick judgement, giving importance to the community, and have a strong mindset to push forward no matter the amount of threat given. As the KAGE of dog tokens, we must set an example of what it's like to present ourselves with honor, integrity and most importantly TRUST.

OUR CORE TOKENOMICS

Our tokenomics consists of 10,000,000,000 total token supply with no burn to begin with. Over time we will be burning a decent amount to keep the price balanced and valuable to our holders during our milestones and goal roadmap phases completion so make sure you HODL.

We have implemented a max wallet of 2% and the purpose of this is to prevent most of the early buyers from buying a large amount of the token supply only to dump and manipulate our chart causing distress within the community.

We have a 10% buy tax and a 10% sell tax to which allocations go towards marketing, team and development, and liquidity which you can read about in the next few pages.

5% MARKETING

The marketing will be used only for the sole purpose of marketing. No funds from the marketing will be used to pay any team members since we have a designated portion of tax already allocated for the team and development. To name a few, these funds will go towards making payment to influencers to shill our project, giving back to the community by hosting frequent giveaways, focusing on YouTube and Social Media coverage along with Medium posts, paying to fund our planned token partnerships with the projects we are currently in talks with, paying for listings to increase volume and many many more so make sure you're following our social media and are active in the telegram to get the latest updates.

4% TEAM AND DEVELOPMENT

We want to come out pure and honest, there will be a 4% wallet where the team will get paid from but this isn't the only purpose of this wallet. We thought long and hard about this and decided to keep a separate wallet for the team tax to go to this way it's easier to track where all the funds go to and from where they come from. These funds will be used to pay team members for their work since we will be dedicating our time and effort for the development of the project. Funds from this wallet will also be used to develop the project such as paying for game assets hand drawn and sculpted by experienced artists and game developers. Hiring blockchain game devs and utility devs aren't free so paying them would come out of this wallet as well.

1% AUTO LIQUIDITY

We want to keep a balanced amount of liquidity for the token to create a healthy growth and accommodate everyone who decides to invest in our project. We aim to have an lp ratio above 10% of total market cap to prevent massive pump and dumps again to accommodate all of our investors and protect your bags. Its as simple as that! Healthy lp = healthy and stable growth.

NOT RENOUNCED

I know we will have questions as to why we won't be renouncing the contract and we'll try to put it as simply as possible. We have future plans to get an audit and they might require us to make changes to the contract. We also need the ownership of the contract to accommodate partnerships with other tokens as well as future staking options which would require us to exclude contracts from taxes when staking on their platforms. If in any case the contract encounters problems in the future or at launch, we would need access to fix them. Renouncing would remove our ability to make improvements and accommodations for token partnerships. For further questions and concerns, please feel free to speak with core team members and we will get back to you in an available time frame.

DIGNITY

We take into responsibility any errors that may occur and do our best to resolve them asap because we value the community and believe so much in the project.

HONOR

It really isnt that hard to take the extra steps to make sure that the token is well respected and safe. We want you to feel proud of being a part of our community and being an investor in the project.

INTEGRITY

Uncorrupted project and team. Everyone chosen to be on the team must adhere to having high level of morals and good hearts. Anyone without these will be fired.

TRUST

You can trust that the team will always work their best to reach our project goals. This does not prevent jeetery of course but we will always be here working hard on theproject development.

OUR ROADMAP

PHASE ONE

- Stealth Launch
 - Telegram Calls
 - First Voice AMA
 - Website V1 Launch
 - Roadmap V1
 - Social Media Account Creation
 - Community Foundation
 - Coin Gecko Listing
 - CoinMarketCap Listing
 - Community Giveaway
 - 3D Token Development
 - Whitepaper V1
 - Burn at 1000 Holders
- 

PHASE TWO

- Professional Telegram Stickers
- Core Team Expansion
- Social Media Marketing
- Medium Publications
- 4Chan Marketing
- Twitter Influencer Push
- Whitepaper V2
- Hire Experienced Marketing Agency
- Token Partnership Networking
- Certik Audit Report

PHASE THREE

- “Feed The Village Campaign”
- Game Document Reveal At 50M
- Video Promotion By Hypercube
- Game Development Update
- Whitepaper V2
- Staking Token Partnership
- NFT Development For The Game
- Separate NFT Collection For The Token
- Frequent AMA’s About Game Development
- Burn At 2500 Holders

PHASE FOUR

- CEX Inquiries And Listings
- Possible Team Expansion
- Game Beta Release
- MASSIVE YouTube Marketing
- Twitch Gaming Tournament And Sponsorships
- Metaverse Arena Integration
- BillBoard Advertising
- Close To Impossible BUT A Great Challenge, We Aim For Mr Beast Sponsorship For The Game Release
- Undisclosed Plans ;)
- Burn At 10,000 Holders
